

Part A : Seen (20 Marks)**Read the text and answer questions 1 and 2.****[Unit-6; Lesson-6(C)]**

Oxygen and the air pressure are always being monitored. In the event of a lack of oxygen, an oxygen mask will automatically appear in front of you. Pull the mask towards you and place it firmly over your nose and mouth. Secure the elastic band behind your head, and breathe normally. If you are travelling with a child or someone who requires assistance, secure your mask first, and then assist the other person. Keep your mask on until a uniformed crew member advises you to remove it.

In the event of an emergency, please assume the bracing position. That is, lean forward with your hands on top of your head and your elbows against your thighs. Ensure your feet are flat on the floor.

A life vest is located in a pouch under your seat or between the armrests. When instructed to do so, open the plastic pouch and remove the vest. Slip it over your head. Pass the straps around your waist and adjust at the front. To inflate the vest, pull firmly on the red cord, before you leave the aircraft. We remind you that this is a non-smoking flight.

You will find this and all the other safety information in the card located in the seat pocket in front of you. We strongly suggest you read it before take-off. If you have any questions, please don't hesitate to ask one of our crew members. We wish you all an enjoyable flight.
